

Skin needs protection from harsh sun, so they roll around or toss mud/dirt onto their backs.

elephants 101

Trunks are both like a nose for smelling and fingertips for plucking leaves off trees.

Ears are in the shape of African continent and act like large fans to keep them cool.

elephants 101

Tusks are made of ivory and they use them to pry bark off trees and dig for roots.

Vocals: One way they communicate is by making very low frequency sounds that travel long distances.

Their feet are highly sensitive and can tune into the direction, distance, and content of another's message.
